Subject: Re: FW: Our discussion re: air monitoring and related issues

Mary Kay,

Per our conversation this morning, I confirmed with Mary and Pam that the HVAC for L14 and L15 was run in occupied mode around the clock from Thursday 8.14 to Thursday 8.21. This was done to facilitate drying of the space in response to the water leak on L15.

I will reach out to the lessor to discuss additional HVAC operation after space delivery but I would anticipate a request for overtime utilities for this service.

Thank you,

William Senn, MPA, PMP

Bill – Please give me an update ASAP about the Lessor's willingness to increase HVAC operation (see below). I will involve you in the meeting that is referenced below. You should decide if you want Bob Bliss to join. Mark and Grady, please coordinate with Dave Gibson if you think he should be asked to participate.
